FRONT-END DEVELOPER

I'm a self-taught web developer driven by a deep passion for crafting responsive front-end web applications. I have a strong command of core web technologies including JavaScript, TypeScript, HTML, and CSS, as well as proficiency in ReactJS and related libraries. I am adept at using JavaScript libraries that complement React, such as Redux/Redux-toolkit, React-query, and React-hook-form. I thrive in challenging environments, demonstrating my ability to work under pressure and maintain a high level of responsibility. Currently, my focus is on developing responsive front-end web applications, while simultaneously expanding my knowledge of back-end technologies to create more comprehensive and robust applications.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, TypeScript.

Frameworks: ReactJS, NextJS. Angular 2+

Back-end: Nodejs-Express, MongoDB, MySQL.

Libraries: TailwindCss, Sass, React-hook-form, Redux toolkit, React-query, Rechart, Framer-motion.

Dev Tools: Visual Studio Code, Git, Postman.

EDUCATION

HCM International University, HCMIU-VNU

Bachelor of Science: Automation Control – 2020

CERTIFICATIONS

Toeic certificate with a score of 905 issued by IIG.

[React certification L2 issued by Interstate21.](#)

WORKING EXPERIENCE

Azbil VietNam

Position: DCS System Engineer (3/2020 – 12/2022)

Created and edited graphical displays of the DCS system.

Conducted various tests on automation systems, including logic, sequence, and unit tests.

Produced and maintained documentation such as system specifications.

FPT Software

Position: Front-end developer (4/2023 – Now)

Developed and maintained user interfaces for web applications using HTML, CSS, and JavaScript.

Collaborated with back-end developers to integrate RESTful APIs.

Utilized frameworks and libraries such as React.js to enhance front-end functionality.

Ensured cross-browser compatibility and responsive design for various devices and screen sizes.

Implemented user-friendly features and optimized application performance.

Worked closely with UX/UI designers to translate designs into functional web pages.

Followed best practices for web development and maintained code quality through regular testing.

PROJECTS

Impacto:

Impacto is a solution designed to help companies achieve their Sustainable Development Goals (SDGs) by offering detailed assessments, structured content, and expertly crafted design elements, all aimed at driving sustainability and impactful change.

Technologies: Nextjs, TailwindCss, Mantine, Typescript, Zustand, ReactQuery. Axios.

PERSONAL PROJECTS

[Top One milk-tea : a website for milktea cafeterias](#)

[Source Code](#)

Key features include the ability for the administrator to change the menu, view the customer's order list, and receive email notifications when there is a new order. Customers can customize their orders as desired, search for their favorite items, chat with the administrator, and find their previous orders using their phone number.

Technologies: ReactJs, TailwindCss, Typescript, Redux/Redux-toolkit, React-hook-form, ReactQuery.

Database: Supabase.

[Myshop: an E-commerce Website](#)

[Source Code](#)

Key features include a dark mode with responsive design, user registration and authentication, the ability to modify cart items, view ordered list, item searching and a map with geolocation API and Leaflet library integration.

Technologies: ReactJs, TailwindCss, Redux/Redux-toolkit, React-hook-form.

Database: Firebase.

[Top one milk-teaV2/Back-end: a back-end for milktea cafeteria](#)

[Source Code](#)

Key features include User authentication, user verification with JWT, image upload with Cloudinary, and CRUD operations for Users and Administrators.

Technologies: Nodejs, Express, Typescript, NodeMailer, JsonWebToken.

Database: MongooseDb, Cloudinary.
